

**Renewable Energy Technologies**

**We Love the Sun,  
We Protect Nature**

[www.trendsolar.com.tr](http://www.trendsolar.com.tr)

- Trend Erk Yatırım Enerji Teknolojileri A.Ş., which has been closely monitoring the renewable energy sector that is of critical importance to Turkey and the world, has accumulated its experiences since 2009 and has become a leading position in the industry. We continue to strengthen both in Turkey and abroad with our strong collaboration with SUNLEGO ENERJİ SİSTEMLERİ A.Ş., a Solar Panel Production facility.
- For us, success is not accidental; it has been possible through knowledge, knowledge sharing, and the support of our friends. Despite fluctuations in exchange rates during this process, we have achieved significant momentum thanks to our customers' commitment and interest in renewable energy.
- The primary goal of **Trend Energy** is to create a more corporate, dynamic, and sincere collaboration with our solution partners, and to achieve successful projects both domestically and internationally based on the win-win principle. In line with this goal, we are determined to maintain our leadership in the sector.

We are proud of the successes we achieved between 2009 and 2024:

**TEDAŞ Approved 127 MW Unlicensed Solar Energy Projects:** During this period, we successfully prepared unlicensed solar energy projects with a total capacity of 127 MW and received approval from EPDK. These projects are a testament to our contribution to sustainable energy.

**TIKA Collaboration:** In collaboration with TIKA, we established Photovoltaic Irrigation Systems in 19 different locations in Guinea and Gambia. Additionally, we provided certified training on renewable energy technologies to over 100 personnel in these countries and continue to offer technical support.

**More than 675 Solar Power Plant (GES) Projects:** The more than 675 turnkey GES projects we have completed reflect our expertise and experience in the field of renewable energy.

**Expanded Dealer Network:** Through communication offices and technical teams across Turkey, we offer closer and faster service to our customers.

Completion of 127 MW  
Projects  
675 Project

**International Presence:** Our contact and coordination locations in various countries such as the United Kingdom, Cyprus, Germany, Sierra Leone, Montenegro, and Azerbaijan reflect our capability to operate on the international stage.

**Quality Products and Experience:** With years of experience, we use reliable solar panel products such as Plurawatt, Schmid Pekintaş, AE Solar, and Elin Solar in field applications. Additionally, we prefer high-quality inverters from brands like Huawei, ABB, Siemens Kaco, SMA, and Tomatech.

**Electric Vehicle Charging:** A partnership has been established with FullCharger for electric vehicle charging units and Renewable Energy Systems, initiating cooperation in Turkey and the foreign countries where we operate.

By combining all these achievements with our commitment to renewable energy and our leadership in the industry, we continue to provide the best service to our customers.

Projects such as **Elazığ 8.260 kWp**, **Bitlis 1.169 kWp**, **Bolu 10.814 kWp**, and **Kaş 4.240 kWp** are a reflection of our commitment and expertise in the renewable energy sector.

These successful projects manifest Trend Enerji's quality, reliability, and vision for environmental sustainability. Each of our projects has been designed and implemented with adherence to our high-quality standards and with consideration of customer needs. These projects have helped us achieve successful outcomes not only in terms of energy efficiency and sustainability but also in terms of customer satisfaction.

As Trend Enerji, we continue to uphold our commitment to leadership in the renewable energy sector, and we are dedicated to expanding this commitment every day. By providing the best service to our customers and contributing to environmentally respectful energy production, we are determined to illuminate the future of the renewable energy sector.
